EDUCATION

CURRENT 2020 Postdoctoral Fellow in COMPUTER SCIENCE
SEPTEMBER 2020 **The Vector Institute & the University of Toronto**, Canada
ADVISOR: [Professor Nicolas PAPERNOT](#)
RESEARCH AREAS: AI, Machine & Deep Learning
I carry out research on trustworthy Machine Learning. The main focus of my project is on adversarial machine learning and deep learning. I investigate how to make artificial neural networks more robust against adversarial and out-of-distribution examples.

CURRENT 2020 PhD Program in COMPUTER SCIENCE
JULY 2015 **The University of Chicago**, USA
ADVISOR: [Professor Sanjay KRISHNAN](#)
RESEARCH AREAS: Machine & Deep Learning, Data Analysis and Management, Databases, Systems
I worked on input and model compression for adaptive and robust convolutional Neural Networks. We explored FFT-based convolution with compression to control resource usage, retain high accuracy, and create more robust models. I also designed declarative interfaces for deep learning and compression of inputs and filters in the frequency domain for the FFT based convolution. We investigated how the Band-Limited Convolutional Neural Networks can be leveraged to create a robust defense against adversarial attacks. Additionally, I did research on recommendation of indexes and hybrid physical designs for SQLServer, as well as the data loading and migration framework for the BigDAWG project.
Courses: [Fundamentals of Deep Learning](#), [Mathematical Foundations of Machine Learning](#), [Machine Learning](#), [Mathematical Toolkit \(Linear Algebra & Probability\)](#), [Convex Optimization](#), [Discrete Mathematics](#), [Algorithms & Data Structures](#), [Databases](#), [Topics in Databases](#), [Operating Systems](#), [Distributed Systems](#), [Computer Architecture](#), [Networks](#).
GPA: 3.91/4
TEACHING ASSISTANT: [Fundamentals of Deep Learning](#), Introduction to Databases, Databases for Public Policy

JUNE 2015 Research Internship
OCTOBER 2014 **École Polytechnique Fédérale de Lausanne (EPFL)**, Switzerland
GROUP: Data Intensive Applications and Systems
ADVISOR: Professor Anastasia AILAMAKI
I built an automated testing infrastructure to benchmark the loading performance of several commercial and open-source databases, performed in depth analysis to identify bottlenecks of the process and investigated novel techniques which could be used to accelerate DBMS data loading.

SEPTEMBER 2014 Graduate Research Assistant
 OCTOBER 2013 **Warsaw University of Technology**, Poland
 MAJOR: Computer Information System Engineering
 MAIN TOPIC: Big Data
 ADVISOR: Professor Jan MULAWKA
 TEACHING ASSISTANT: Bioinformatics Algorithms

MARCH 2013 Master of Science in COMPUTER SCIENCE
 OCTOBER 2011 **Warsaw University of Technology**, Poland
 MAJOR: Computer Information System Engineering
 THESIS: “An analysis and comparison of non-relational (NoSQL) databases with an example of application using CouchDB.”
 TECHNOLOGIES: CouchDB, Riak, HBase, Python, Django, jQuery, sphinx
 ADVISOR: Professor Piotr GAWRYSIAK
 GPA: 4.93/5 (top 5%) THE FINAL GRADE: Excellent

SEPTEMBER 2011 Bachelor of Science in COMPUTER SCIENCE
 FEBRUARY 2011 **Warsaw University of Technology**, Poland
 MAJOR: Computer Information System Engineering
 THESIS: “Document management system – application in three-tiered architecture.”
 ADVISOR: Ph.D. Eng Jarosław DAWIDCZYK
 TECHNOLOGIES: PostgreSQL, Java, JEE, Hibernate, Dojo, PowerDesigner
 ObjectLedge, TestNG, JUnit, OO Design, Apache Tomcat
 GPA: 4.80/5 (top 5%) THE FINAL GRADE: Excellent

JANUARY 2011 **Technical University of Denmark**, Copenhagen, Denmark
 AUGUST 2010 Erasmus Programme
 Courses: Logical Systems and Logic Programming, Advanced Databases, Applied Statistics and Statistical Software, Web 2.0 and Mobile Interaction, Java Programming
 GPA: 11.71/12

JUNE 2010 **Warsaw University of Technology**, Poland
 OCTOBER 2007 MAJOR: Computer Information System Engineering

JUNE 2007 **Stefan Żeromski’s High School in Kielce**, Poland
 SEPTEMBER 2004 Extended curriculum in mathematics and physics

WORK EXPERIENCE

SEPTEMBER 2017 JUNE 2017	<p>GOOGLE (MADISON, THE US)</p> <p><i>PhD Software Engineering Intern at Data Infrastructure and Analysis team</i></p> <p>Mentor: Goetz Graefe</p> <p>Eliminated a performance cliff in the F1 database for the aggregation queries. Researched and designed different methods of incremental spilling and skew-awareness for graceful aggregation.</p> <p>Contributed to the low-level data structures and made changes that were crucial to achieve robust performance in F1.</p> <p>Coded in C++, wrote tests and performed code reviews.</p> <p>Participated and presented a poster during the internal Google PIRC 2017 conference for PhD interns.</p>
JUNE 2017 MARCH 2017	<p>MICROSOFT RESEARCH (REDMOND, THE US)</p> <p><i>Intern at Data Management, Exploration and Mining (DMX) group</i></p> <p>Mentors: Vivek Narasayya and Sudipto Das.</p> <p>Worked on analysis and acceleration of query execution for mixed (OLTP and OLAP) workload.</p> <p>Carried out research on hybrid physical structures for diverse workloads.</p>
AUGUST 2013 JUNE 2013	<p>BARCLAYS INVESTMENT BANK (LONDON, THE UK)</p> <p><i>Intern Analyst at Equities Derivatives Technology</i></p> <p>Technologies: Java, Spring, Maven, Velocity, Jetty, JIRA, JUnit, JMock</p> <p>The goal of the project was to validate current underlyings and suggest new underlyings for a given product, for example, a reverse convertible instrument. I created a system that went into production and brought value to business.</p>
DECEMBER 2012 APRIL 2012	<p>CERN (GENEVA, SWITZERLAND)</p> <p><i>Technical Student at IT Department and CERN Computer Center</i></p> <p>I worked on NoSQL and NewSQL databases.</p> <p>Technologies: NoSQL, CouchDB, Python, Django, tastypie, jQuery, sphinx, MapReduce, git, REST</p> <p>My role involved developing a project to store information on configuration and management of non-host devices at CERN Computer Centre. This began with gathering requirements from internal users and continued through design, implementation, testing, and deployment. The data was stored in CouchDB database and exposed via REST-ful API.</p>
MARCH 2012	<p>MOBILE STARTUP (app providing aspects of music social interactions)</p> <p>Technologies: Python, Django, PostgreSQL, JavaScript, jQuery, Android</p> <p>My mobile start-up which provided aspects of music social network interaction. The application was based on rich user experience and heavily used social media API-s such as last.fm and youtube.com. My team took part in Startup Sauna program.</p>

JULY 2010	TEKTEN SP. Z O.O. (WARSAW, POLAND) <i>Dababase designer, Java and PL/SQL software developer</i> Internal system project Technologies: Java, PL/SQL Database: Oracle 10g
SEPTEMBER 2009 JULY 2009	TORN SP. Z O.O. (WARSAW, POLAND) <i>Java and JavaScript software developer</i> Financial and accounting system project Technologies: HTML, CSS, JavaScript, Java Database: Oracle 10g

TECHNICAL SKILLS

PROGRAMMING LANGUAGES	C++, Java, Python (advanced), C, Bash, JavaScript, PowerShell PL/SQL (intermediate), C#, Prolog, R, Octave, Haskell, Scala (basic)
FRAMEWORKS	PyTorch, TensorFlow, Django, Spring
DATABASES	PostgreSQL 8.4-9.6 (advanced), NoSQL databases (CouchDB, Riak), MonetDB, Oracle 10g/11g/12c, SQL Server, Vertica (intermediate), VoltDB, S-Store, MariaDB (basic)

AWARDS

2019	ICML Travel Award.
2018	SIGMOD Travel Award.
2011-2012	The scholarship of the Rector of the Warsaw University of Technology for my achievements during Master's program.
2007-2011	The academic scholarship for the best faculty students (granted on a yearly basis and based on GPA).

LANGUAGES

POLISH	Mother tongue
ENGLISH	Fluent
FRENCH	Basic Knowledge

INTERESTS AND ACTIVITIES

GUITAR	I finished a 5-year music school in classical guitar class.
GEOGRAPHY AND TRAVELLING	Travelling is my passion. I won a Polish Olympiad of Geography 2004, the main topic of which were Asian countries.
SPORTS	I am an amateur basketball player. I was a member of my high school basketball team. I attend martial-art courses at the University of Chicago.
